

## Online Resources for Parents

The Internet is (sometimes) your friend! Here are a few of our favorite online resources for adults who want support in talking to the youth in their lives about healthy relationships and related topics. Many of them link out to other fantastic resources, and though these particular websites and articles are primarily geared toward parents, most are adaptable and even include resources for youth-serving adults and for young people as well.

### Online Resource Centers

#### **Scarleteen: For Parents and Guardians**
